

Revoluzza Monster

1. Pin monster template to 2 layers of fabric. They don't have to be the same fabric. Make the fabric layers right sides touching each other (on the inside) Cut out the monster.
2. Cut out the eyeball and heart template pieces. Trace and cut out two eyeballs and a heart out of felt. I use a button for the inside of the eyeball, and I just cut out a tooth without using a template.
3. Layout out the eyes, tooth and heart to where you want them placed. Remember there will be a seam all the way around, so don't put the eyes too close to the edge.
4. Draw the mouth with a pencil. Using the backstitch and embroidery thread, hand stitch the mouth.
5. Sew on the buttons. Sew two parallel lines, not an X. If you sew an X, it makes the character look dead.
6. Sew on the heart using a whip stitch. Sew on the tooth using a running stitch.
7. Match the right sides together for the monster and pin. Stitch all the way around, except leave a hole between the legs of the monster.
8. Stuff the monster through the hold. Whip stitch the hole shut.
