

Name: _____

Skirt Fabric Calculation

	Very gathered	Moderately gathered	Moderately fitted
Fabric width	waist x 2	hips + 10" to 12"	Hips + 4"

Fabric length for all skirts = waist to bottom + 2¼" (waistband) = 1½" (hem)

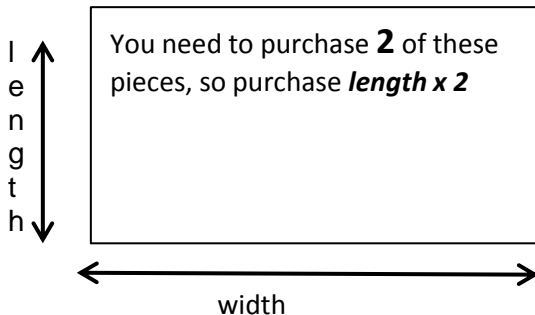

Measurements:

Waist Measurement	
Hip Measurement	
Waist to bottom of skirt	

Type of skirt (from above)		
Total fabric width needed (from above)		
Width of purchased fabric:		
Fabric length needed: (see below)	<input type="checkbox"/> length x 1 <input type="checkbox"/> length x 2 Total length: _____	

If your **Total fabric width needed** is **less** than the **Width of purchased fabric**, you only need to purchase the **length x 1**. For example: If your **Total fabric width needed** is 50, and your **Width of fabric to purchase** is 54, and your **Waist to bottom of skirt** is 25", then only purchase 25" of fabric (around 3/4

If your **Total fabric width needed** is **more** than the **Width of purchased fabric**, you need to buy **length x 2**. For example: If your **Total fabric width needed** is 50", and your **Width of fabric to purchase** is 44", and your **Waist to bottom of skirt** is 25", then purchase 25" x 2 = 50" of fabric (around 1.5 yards)
